INDEX DES NOTICES CLASSÉES SELON LA C. D. U.

On trouvera ci-dessous un numéro d'ordre pour chaque article classé sous les grandes rubriques de la C.D.U.

0. General reference works; librarianship / Ouvrages généraux de référence; bibliothéconomie: 183-187, 190-203, 205-208, 212-215, 225, 228, 232, 244, 245.

1. Philosophy; ethics / Philosophie; morale: 208, 236, 244.

2. Religion; theology / Religion; théologie: 225, 247, 251.

3. Social sciences / Sciences sociales: 190-192, 196. 208, 210, 212, 219, 221, 227, 236, 238, 246, 249.

4. Philology; languages / Philologie: langues: 199, 215, 223.

5. Pure sciences /Sciences pures: 184, 196, 200, 204, 208-210, 213, 223, 224, 226, 231, 232, 235, 237, 241, 242, 243, 244.

TABLE OF REFERENCES ACCORDING TO THE UDC

Readers will find under the following subject-heading (marked with their appropriate UDC figure-symbols) the relevant number for each item.

6. Applied science and useful arts / Sciences appliquées et arts utiles: 184, 187, 194, 196, 200, 208-210, 213, 216, 218, 222, 224, 228, 232, 235, 241, 242, 244.

61. Medicine / Médecine: 208, 217, 234, 237, 244, 250, 252.

7. Fine arts and recreation / Beaux-arts et récréation: 188, 189, 199, 211, 226, 229, 230, 240.

8. Literature / Belles-lettres et littérature: 209, 247.

9. Geography; history; biography, etc. / Géographie; histoire; biographie, etc.: 198, 199, 208, 220, 225, 228, 233, 239, 248.

Abonnement annuel: $2.00; 12/6; 600 fr.

UNESCO BULLETIN FOR LIBRARIES

VOL. VIII, NO. 4 APRIL 1954

(183) PUBLIC LIBRARIES IN AFRICA

In continuation of the reports on public library development in Africa already published in the *Bulletin* (vol. VI, no. 11-12, item 562), we give below descriptions of library services in two other parts of the continent. The first account shows how a public library system—Algeria—which has been in existence for many years is continually expanding to meet the varied needs of all sections of the community; the second describes an entirely new network which has recently been started in Uganda.

Readers are referred to the *Bulletin* (vol. VII, no. 11-12, item 633, and vol. VIII, no 1, item 8) for an account of the Unesco seminar on public library development in Africa and for the recommendations that were made there. A full report on the seminar is now being prepared and will appear, in English and French, later in the year as no. 6 in the *Unesco public library manuals*.

ALGERIA

NATIONAL LIBRARY, ALGIERS

The National Library at Algiers was founded in 1835. It is the oldest cultural institution in Algiers and at the same time represents the first attempt at introducing a public library system in Algeria. The library is open to all, and consists of a French and Moslem section. The Moslem section, in addition to a collection of 2,334 manuscripts, has an important stock of books in Arabic which is constantly kept up to date. There are about 350,000 volumes in the French section. Under the legal deposit law the library receives copies of all books published in Algeria. A new building is being erected, to house 2 million volumes, with a seating capacity for over 500 readers. A large amount of space will be reserved for handling and preparing books for public libraries throughout the country.

The National Library provides books for 186 libraries in the three Algerian departments—small community libraries, libraries for those who have left school, village hall libraries, libraries in hospitals, sanatoria and prisons. The Administrator of the National Library makes tours of inspection enabling him to keep in touch with the different organizations and determine their needs. The possibility of sending book boxes to these centres in 1954, in addition to their regular stock, is being considered. Books are sent by rail or, more often, by road. The provision of a mobile library van is also being considered in spite of the great cost of such a service owing to the distances to be covered.

MUNICIPAL LIBRARIES

Algeria has at present 57 municipal libraries of varying sizes open to all readers. Books are provided partly out of municipal funds and partly by the National Library in Algiers. The Municipal library at Algiers (one central library and nine branches) has 76,000 volumes and special sections for children of all ages; the library at Oran has 30,000 volumes, the number of its readers rising from 15,851 in 1946 to 28,889 in 1952, and the number of registered borrowers from 579 to 810; the library at Constantine has 26,000 volumes and

11,960 readers; Setif has 15,000 volumes, and Bone 8,500 volumes. Since the end of the war, as the result of growing interest in reading, small libraries have been set up in Sidi-Bel-Abbes (1949), Bougie (1950), Mers-el-Kebir (1950), Djidjelli (1952) and Mosteganem (where it is still in process of organization).

MUNICIPAL CENTRES IN KABYLIA

The Kabyles have long been asking for libraries, as well as schools for their children, to be set up in their villages. During 1953, 12 small libraries were established in the district of Michelet in tiny villages perched on the mountain side, accessible only on foot or by mule. The Kabyles have shown themselves to be keen readers of factual and scientific books. As these experimental libraries in Upper Kabylia have proved a success, six libraries are being organized in the Fort National region.

RURAL LIBRARIES

The National Library is also setting up 20 small libraries in the southern oases (Ghardaia, Touggourt, El-Golea, Ain-Sefra, El-Oued, etc), generally to be housed in school buildings. It will supply books in Arabic, books on travel, legends, stories, and books suitable for young people 14-16 years old.

A number of schools have post-school libraries called "popular libraries" (about 20 in the three departments). These, open to all the villagers, vary in size and generally owe their existence to an enthusiastic schoolmaster, who has roused sufficient interest among the community to get some local assistance for the cataloguing and care of the books.

Another type of rural public library is connected with the recently created Mouvements de Jeunesse et d'Éducation Populaire, founded in 1946. This organization, set up in Algeria by the Ministry of National Education, deals with youth organizations in general (scouts, youth hostels, etc.), but its main activities are centred round the youth clubs and community centres.

Since 1947 a number of rural community centres, or village meeting places, have been set up. By 1952, 74 of these centres had been established and a total of 84 is scheduled for 1954. The National Library supplies each centre with a stock of books, to be exchanged later for another stock, and in addition there are book boxes made available by the youth movements. In 1952, the youth movement organization had 13,000 volumes, 6,000 of which had been distributed to the various branches, the rest being available for circulation: 40 book boxes, of 60 books each, thus travel by road or rail through all three departments. These small libraries have great popular support: in Mahelma, the Community Centre, with 200 members, has devoted 50,000 fr. a year for the purchase of newspapers and periodicals; at Montpensier the people have borne the cost of furnishing and decorating a reading room.

Space does not permit us to describe the numerous other public library services, growing in size and number, which are operated in Algeria by both government and private initiative.

THE UGANDA PROTECTORATE

In 1950 the East African Literature Bureau took over a library service in Uganda which had been started in 1947 with donations of books from the British Council. The present librarian arrived in July 1951 and spent the first few months organizing the library headquarters at Kampala. In January 1952 a week's training course was held for social welfare assistants and other voluntary librarians who were responsible for the bureau's libraries. They were given instruction in elementary procedure and certain simple routines were laid down so that methods should be uniform.

By the early months of 1952 the organization of the headquarters was almost complete, and it was felt that new supplies of books could be distributed with a reasonable hope that they would be suitable and would be adequately looked after. By the middle of 1953 there were 60 library centres all over Uganda, most of which exchanged their books regularly. The libraries are for the most part supplied to African social clubs, missions, schools and training centres, from a total stock of some 16,000 books. Special shelved library boxes are used which open to form a small bookcase; each contains 150-200 books. These are exchanged for a fresh supply every six months, or as often as the institution requires, and the books are selected according to suggestions and requests received. A wide range of subjects is represented and native language books are included on request, though for the most part the books supplied are in English of a standard suitable for the reading ability of the users. The charge for this service is Sh.100 per annum, paid to the Uganda administration, the bureau bearing all transport costs.

LIBRARY POSTAL SERVICE

The second branch of the bureau's library is a service by post to individual readers. Any person in Uganda may become a member on payment of a deposit of Sh.10, on receipt of which he is sent a printed catalogue from which he selects the books he wants to borrow. His deposit is refunded when he wishes to end his membership, provided that he has not lost any books, or has paid two-thirds of the published price for any book lost. The parcels of books are carried through the post free of charge, both to and from the reader.

This service was started in 1948, but has been reorganized since 1951, when there were 153 members, of whom not more than half were active. By the summer of 1953, largely owing to publicity measures, there were 400 members. The book stock set aside for these readers is of a rather more advanced standard than that supplied to the library centres. A new catalogue of some 1,200 titles was issued in 1952. In 1953, issues averaged 260 books a month and new applications were arriving at the rate of 25-30 a month.

KAMPALA MUNICIPAL LIBRARY

Opened on 5 March 1953 and intended for the use of anyone living in Uganda. It is a non-fiction library of 3,000 volumes, with 200 volumes for reference only. Membership of the lending library entails a rather high subscription of Sh.15 per year for two tickets per person, plus a deposit of Sh.15. The books are housed in a small, though suitable, room, specially built on to the town hall. The cost of the basic book stock and the equipment (£2,800) was borne by the Uganda Protectorate Government and the Kampala Municipal Council. The Protectorate Government makes an annual grant of £200 for the purchase of books. The staff consists of a European working part-time with previous experience of work in municipal libraries in England, and a clerk, who is helped in the evenings by a European graduate, with however no previous experience of library work.

MAKERERE COLLEGE LIBRARY

As we are concerned here only with public services, only brief mention is made of Makerere College Library which is already widely known. It is the only library of its kind in East Africa and by far the largest general library in the whole of these territories. In March 1953, its total book stock was upward of 28,000 bound volumes and 7,000 to 8,000 pamphlets and unbound parts. It covers most of the branches of learning normally within the range of a university library, although subjects on the present curriculum are naturally more fully covered than others (i.e. arts, science, medicine, agriculture, veterinary science, and education).

NEWS AND INFORMATION

UNESCO AND INTERNATIONAL NEWS

(184) SCIENTIFIC AND TECHNICAL DOCUMENTATION CENTRES

After several years of assistance from Unesco under the UN Technical Assistance Programme, two scientific and technical documentation centres, in Mexico and Yugoslavia, are now—or very soon will be—operating on their own. The *Bulletin* presents a brief summary of the achievements accomplished since 1951 and urges its readers in the areas served by these centres to utilize the services described and help in assuring their development.

MEXICO

The Mexico City Centre (Plaza de la Ciudadela 6, Mexico City 1, D.F.) was set up early in 1951. The first expert, Mr. Pérez Vitoria (Spain), who was subsequently appointed director, arrived in the country in April 1951; he was followed by Mr. David Cairns (New Zealand), head of the bibliographical service, Mr. C. Brinkley (United States of America), head of the photographic service, and Mr. Garrido (Spain), head of the abstracting service. Thanks to the help received from the Mexican Government, which placed considerable resources at the centre's disposal, the premises were ready early in 1952.

The centre is responsible both for co-ordinating the resources of the various scientific and technical libraries in Mexico and for adding to the available material. It serves the universities, technical colleges, scientific research laboratories, and industry. Unlike certain similar centres, it was planned from the beginning as a regional institution to serve the whole of Latin America.

ACHIEVEMENTS

The bibliographical service has built up card indexes enabling it to reply to requests for information from industry and scientific bodies. It has also undertaken the preparation of a union catalogue of scientific publications in Mexican libraries. The Academy of Medicine in Mexico City has supplied a considerable stock of publications, and exchanges have been arranged with a large number of foreign institutions.

The photographic service has reproduced many documents, and orders from the Government and from industry have brought the centre useful additional funds.

An increasing number of titles and abstracts have appeared in the centre's bibliographical bulletin (see *Bulletin*, vol. VI, no. 5-6, item 235). From March to August 1953, for instance, 35,485 titles were published. The bulletin has been circulated free of charge or on an exchange basis in certain cases, but the number of subscribers has steadily increased. Several scientists and scientific institutions have given voluntary help in preparing it, and a translation service, organized mainly to make German and Scandinavian publications accessible to Latin American readers, has also proved useful. Although French and English are generally understood, courses in these two languages have been organized for prospective users of the bulletin. An increasing number of readers have made use of the reading room at the centre.

EXCHANGE SERVICE

The centre invites all editors of scientific journals from Latin American and other countries wishing to make exchanges to send in their detailed requests together with samples of the publications they offer in exchange. The centre will forward these to the countries and journals interested.

CONCLUSION

The success of the centre is due, in part, to the considerable publicity organized from the outset by the director and his colleagues, and to the excellent liaison established, not only with the Mexican authorities, but with the Inter-American Cultural Council, the Mexican Science Congress, Unesco's Science Co-operation Office in Montevideo, the Inter-American Institute of Agricultural Sciences, the French National Centre of Scientific Research, and a large number of institutions in different countries.

Three of the four Mexican specialists who were awarded fellowships for study abroad have already replaced the Unesco experts. They are Mr. Priego Lopez, at present in charge of the abstracting service, Mr. Mosqueira Roldan, head of the photographic service, and Mr. Oest Cordova, head of the bibliographical service, succeeding Mr. Cairns, whose death during the course of his mission was a great loss to the centre. Mr. Sandoval Caldera has been in charge of the centre since Mr. Pérez Vitoria left in February 1954. There are therefore good prospects that, at the end of Unesco's technical assistance mission, the centre will be able to continue its activities to the advantage of all the Latin American States.

YUGOSLAVIA

Under the technical assistance agreement with Yugoslavia, Unesco sent an expert on bibliography, Mr. W. Mikulaschek (Switzerland), and an expert on photographic reproduction, Mr. O. Spohr (South Africa), to the Scientific and Technical Documentation Centre in Belgrade (address: Admirala Geprata 16, Pošt fah 724). Both experts arrived in August 1952. Mr. Spohr's assignment ended in March 1953 but Mr. Mikulaschek will continue his work until August 1954.

These two experts were given the task of reorganizing the Federal Documentation Centre in Belgrade—which already had a large library and a staff of over eighty persons—to meet the demands for documentation arising out of the country's rapid agricultural and industrial development. They had to help the centre, founded in 1949, to move on from bibliographical to documentation work proper and to familiarize the public services, and the various bodies concerned, with the idea of documentation.

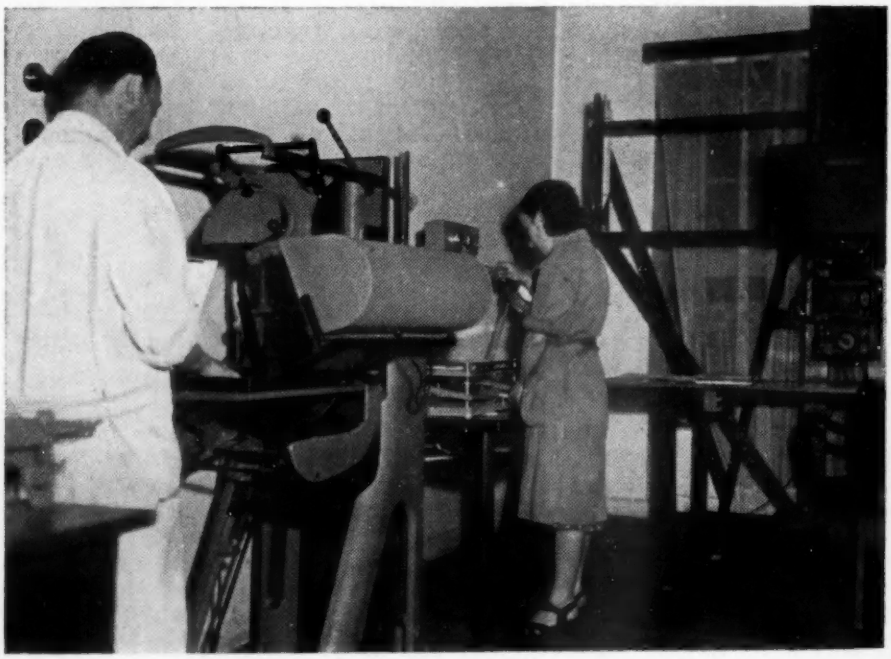
ACHIEVEMENTS

The two experts, under Mr. Mikulaschek's direction, organized four departments at the centre, starting with a reproduction department in which they used the classic methods of microfilm and photographic reproduction: although a microfilm reproduction service already existed, they bore in mind that scientists and technicians often prefer photocopies. The editorial department was made responsible for preparing the centre's bulletin. It was decided that this bulletin, intended mainly for technicians, should give Serbo-Croat translations of the titles and abstracts of foreign articles. The main function of the information department is to reply to specific questions from technicians, scientific institutions and industry; for this purpose, the centre's card index has been reorganized, firstly under major headings and secondly according

to the universal decimal classification system. A catalogue of foreign and Yugoslav periodicals has been prepared. Exchanges have been arranged with foreign institutions, and for this purpose a multilingual catalogue of Yugoslav publications has been produced (see *Bulletin*, vol. VII, no 5-6, item 383). Lastly, the centre has prepared documentary bulletins for economics, natural sciences (mathematics, astronomy, physics; chemistry; mineralogy; geology; botany, zoology; pharmacy, medicine) (see *Bulletin* vol. VIII, no 2-3, item 120) and technical sciences (agriculture and forestry, electrical engineering, mining and metallurgy, industrial chemistry, civil engineering and transport).

The fourth department of the centre is the technical library, consisting of over 40,000 vols., made up of existing stocks of books and a large number of gifts, including a collection of technical works presented by the United Nations. As a result of a number of lectures and active propaganda work, Yugoslav industry has been made aware of the services the centre can render, and increasing numbers of requests for documentation are coming in. Incidentally, the Belgrade centre is the co-ordinating link in a network of documentation centres already in existence or about to be established in the various Yugoslav republics.

It must be emphasized that the success of the mission is very largely due to the efforts of the director of the centre and his colleagues and to the moral and financial support it has received from the Yugoslav Government throughout its work. Three Yugoslav specialists who were awarded fellowships for study abroad have already replaced the Unesco experts—Mr. Asim Alivodić, deputy director; Mr. D. Z. Protić, head of the information service, and Mrs. Milena Popović, head of the periodicals section. With their help the centre should be able to continue its work satisfactorily after Mr. Mikulaschek's departure.



Preparing photocopies of documents to be sent to Yugoslav scientists.
Préparation de photocopies de documents destinées aux savants yougoslaves.

(185) UNESCO'S ASSOCIATED LIBRARY PROJECTS

Two libraries and another library school have been accepted as associated projects by Unesco—the Rural Public Library Demonstration Programme of the Arab States Fundamental Education Centre in Egypt (ASFEC), the International Youth Library in Munich, Germany, and the Library School of the University of Delhi, India.

ASFEC LIBRARY ACTIVITIES

The Rural Public Library Demonstration Programme of the Arab States Fundamental Education Centre is intended mainly as a demonstration of public library services for students at the centre, who are being trained as leaders in rural improvement work to raise the standard of living in Arabic countries. Active participation in the work of demonstration libraries, and in a library science course, shows the trainees how they can later set up public library services as an aid to fundamental education in their own countries.

The first unit in a network of rural public libraries, the Sirs-el-Layyan Community Library, was organized in June 1953 by the centre in collaboration with the local Rural Reform Society. The centre furnished technical assistance in organizing the library, a collection of approximately 2,000 books secured by purchase and gifts, and provided practical library training for two local secondary school teachers and three pupils who are serving as volunteer assistants. Activities at the community library are planned and executed in close collaboration with the centre's experts and trainees (e.g. adult literacy classes, health talks, fortnightly outdoor film shows, children's story hours, needlework and handicrafts, etc.)

Neighbouring elementary and secondary schools and rural social centres, particularly in villages where ASFEC field teams are located, are also being assisted in organizing and operating libraries. The centre's library will serve as a regional library headquarters. Small travelling loan collections containing approximately 250 children's books, professional books and teaching materials for the use of teachers, will be arranged and circulated regularly. Travelling exhibits on subjects of current interest will also tour the villages. (See "Publications wanted", item 214).

INTERNATIONAL YOUTH LIBRARY, GERMANY

The International Youth Library in Munich, directed by Mrs. Jella Lepman, is unique in that it was founded to further international understanding among children and young people (See *Bulletin*, vol VI, no. 7, item 280). Since its opening in 1949, the library has assembled 20,000 books from 39 countries —all gifts from other libraries and from publishers. Activities organized by the library include exhibitions, film showings, lectures, discussions, story hours, book reviewing, study of foreign languages and painting groups.

LIBRARY SCHOOL OF THE UNIVERSITY OF DELHI

Since 1945 the Library School of the University of Delhi has trained 70 librarians. It gives a one-year course leading to a diploma and a two-year course leading to a degree in library science. A bachelor's degree is a prerequisite for both courses. The school also offers facilities for research leading to a Ph.D.

OTHER PROJECTS

Membership in the associated projects scheme is open to public libraries doing pioneer work for fundamental or adult education and to library schools in Unesco Member States. Full details concerning the scheme are given in

Associated projects: public libraries and library schools (Unesco Document CUA/49). Copies may be obtained free by writing to the Libraries Division, Unesco, 19 avenue Kléber, Paris-16e, France.

(186) UNESCO CLEARING HOUSE FOR PUBLICATIONS

HELP IN MEETING TRANSPORT COSTS

Each year the Unesco Clearing House for Publications offers a small amount of money to help defray transport charges for shipments of gifts of books, when such charges cannot be met by the recipient libraries. Libraries which have responded to appeals made by Unesco, and which have been notified that they can be reimbursed, are asked to send as soon as possible two copies of a statement of their expenses to the Clearing House, in order that the payment may be made.

All libraries who are prepared to make book gifts are urged to do so. Several of the most urgent requests for publications appear in each issue of the *Bulletin* in the section "Publications wanted" (See page B 37). Libraries which wish reimbursement are asked to inform the Clearing House of the charges they have incurred in making such shipments. No guarantee can be given that in every case the full amount can be refunded, but, depending on the funds available, as much help as possible will be given to donor libraries.

In the past years the average amount of assistance given to any one library was the equivalent of between $10 and $20.

Where possible, libraries should send their publications through their national exchange centres, which in general provide the most economical means of transport.

FREE DISTRIBUTION AND EXCHANGE OFFERS

One of the services rendered by the Unesco Clearing House for Publications is to assist in the organized disposal of surplus library stocks. Since the beginning of the service in 1947, over 500 lists of duplicate publications offered for exchange or free distribution have been circulated to more than 2,500 libraries in all countries.

Many libraries, when completing and returning the Unesco Library questionnaires, indicate their desire to take part in this service. Some libraries which have taken good advantage of the lists of offers have obtained many hundreds of volumes during 1953. Others, however, rarely make full use of them. In order to meet the needs of new libraries, the addresses of libraries which do not seem to make use of the lists are periodically withdrawn. In these cases, libraries are informed of the action taken and offered the chance to be replaced either on the same list or, if they prefer, on another list, if they intend to make use of the offers at some future time. However, it is not always possible to reinstate libraries immediately, as there are usually many accumulated requests from new libraries and, for financial reasons, there are limits to the number of libraries which can receive lists. Libraries who wish reinstatement are hereby notified that while every consideration will be given to their request, the needs of new libraries must for the time being have priority.

PROGRESS IN BIBLIOGRAPHICAL SERVICES

(187) INTERNATIONAL ADVISORY COMMITTEE ON BIBLIOGRAPHY

At its 1951 and 1952 sessions the International Advisory Committee on Bibliography made a number of recommendations regarding the conclusion of

contracts for work designed to improve bibliographical services (see *Bulletin*, vol. VI, no. 7, item 308). The following is a brief analysis of the reports or publications which Unesco received in 1953 as a result of the execution of these contracts.

STANDARDIZATION OF BIBLIOGRAPHICAL TECHNIQUES

A contract was concluded with the International Organization for Standardization (ISO) for work to be carried out by its Technical Committee 46: Documentation (ISO/TC 46).

The ISO report submitted to Unesco contains one recommendation and three draft recommendations on the international code for the abbreviation of titles of periodicals; the layout of periodicals; bibliographical citations; and bibliographical references.

The work of ISO is carried out by various technical committees, associating a number of national member organizations and each provided with a secretariat, which is located with one of the national members and operates under the control and authority of the ISO council. Thus, the secretariat of the Technical Committee for Documentation (ISO/TC 46) is provided by the Netherlands committee which has entrusted the Netherlands Institute for Documentation (NIDER) with the work. The following countries are members: Austria, Belgium, Czechoslovakia, Denmark, Finland, France, Germany, Hungary, India, Israel, Italy, Netherlands, Portugal, Spain, Sweden, Switzerland, Union of South Africa, United Kingdom, United States of America (as active members); Australia, Chile, Ireland, Japan, Mexico, New Zealand, Norway, Poland, Rumania, U.S.S.R., Uruguay and Yugoslavia (as observer members).

The matters to be standardized are studied by the technical committees and discussed in detail at plenary meetings. When study of a particular matter is sufficiently advanced, a preliminary draft is prepared for the technical committee concerned, either by a specialized working group or by a sub-committee. If this draft is approved by the members of the committee, the secretary-general of ISO sends it, as a draft recommendation, to all ISO members, including those not associated with the technical committee involved. If the draft recommendation is accepted by the majority of the national members it is submitted to the ISO council for approval. Once so approved, it becomes an ISO recommendation, ready for publication.

The recommendations mentioned above are the outcome of long-term work which the contract between Unesco and ISO has expedited, particularly by making it possible to hold meetings of experts and working groups. In this connexion it should be emphasized: firstly, that the texts have been reduced to bare essentials, it being left to the national bodies to develop, into national standards illustrated by examples, the general rules upon which international agreement has been reached; secondly, that the recommendations are not mandatory. Nevertheless, assuming that they are given the widest possible circulation and that their application is encouraged by the bodies responsible, they have increasing prospects of being implemented.

A new contract, which the International Advisory Committee on Bibliography, at its April 1953 session, likewise recommended, has been concluded between Unesco and ISO. It concerns the publication of a pamphlet containing the texts referred to above, accompanied by explanatory comment. The pamphlet will be published during 1954 and given large-scale circulation by Unesco, ISO, IFLA and FID.

STANDARDIZATION OF ASIAN NAMES

A further contract has been concluded with the Indian Library Association with a view to standardizing authors' names in Asian countries for the purpose of entries in catalogues and bibliographies.

This contract involves no study of transliteration problems. Its aim is to establish, for Eastern authors' names, rules similar to those applied to Western authors' names in the preparation of bibliographical entries for catalogues. The difficulty of this task will be realized when we consider that, in the West, the first attempts of the kind date from the seventeenth century, and that differences nevertheless still exist from country to country, although international unification is very largely an accomplished fact.

For the purposes of the project, the Executive Committee of the Indian Library Association considered it desirable to identify the following 18 groups of languages and cultures:

Tamil	Punjabi	Urdu (Pakistan)
Malayalam	Hindi	Burmese
Kanara	Bengali	Singhalese
Telugu	Uriya	Indonesian
Mahrati	Assamese	Siamese
Gujarati	Urdu (Deccan)	Annamese, Cambodian, Laotian

Dr. Ranganathan, in charge of the execution of the project, either made personal contacts or arranged by correspondence for the formation of national committees and for the appointment of national rapporteurs for each group of languages.

A report summarizing the work done and the proposals made for each group has been sent to Unesco. It will be submitted to three Western experts on Oriental studies and librarianship. On the recommendation of the International Advisory Committee, contracts have been made with Mr. H. I. Poleman, Chief, South Asia Section, Library of Congress, Washington, Professor Jean Filliozat, of the Collège de France, Paris, and Mr. J. Leveen, Keeper of the Department of Oriental Printed Books, British Museum, who will consider the proposals made by the Asian countries and put forward criticisms and suggestions.

USE MADE OF TECHNICAL BUILDING LITERATURE IN THE MIDDLE EAST

The International Council for Building Documentation (CIDB) (see *Bulletin*, vol. VIII, no. 1, item 6) has completed a study on the use of technical building literature in countries of the Middle East. A few copies are available from Unesco.

Specimens of building documentation were provided from Austria, Belgium, Canada, Denmark, France, Great Britain, Italy, Norway, the Netherlands and Portugal. The countries from which replies were received to a questionnaire on the use made of it were Iran, Israel, Lebanon, Syria, Turkey. The majority of the material sent was selected for its special relation to building conditions in the Middle East.

In spite of the general interest in such documentation, the countries replying to the questionnaire indicated that the problems which they have to deal with are not fully covered in the literature supplied. To remedy this situation, most countries are anxious to create a national centre or committee for building documentation, and in Israel and Turkey there are indications that this may be achieved. Organizations now existing or in course of being created which may help in meeting this need are: the Fuad I National Research Council (Egypt); the Departments of Scientific and Industrial Research in Pakistan and Iraq; the National Library in Turkey; the National Research Council in Israel.

The technical building publications which appear at present in the Middle East are: *Türk Yüsek Mühendisleri birligi dergisi* (Ankara); *Arkitekt* (Ankara); *Mimarlik* (Istanbul); *Journal of the association of engineers and architects in Israel* (Jerusalem); *Revue des ingénieurs* (Cairo); *Revue du bâtiment* (Cairo).

Having completed this study, the CIDB hopes to continue its efforts to aid the countries of the Middle East in their building programmes, and to help them to provide the building documentation which will best meet their needs.

MICROFILMS, MICROCARDS AND DOCUMENTARY REPRODUCTION

(188) OUT-OF-PRINT AND CURRENT PERIODICALS ON MICROCARD

Out-of-print issues of the following periodicals may be secured in the form of micro-reproduction (microfilm sheets or microcards) from the publisher Masson and Co., 120 boulevard Saint-Germain, Paris-6e: *Annales de chimie, Annales de physique; Annales de l'Institut Pasteur; l'Anthropologie; Bulletin de l'Académie de médecine; Bulletin de l'Institut Pasteur; Bulletin de la Société de chimie biologique; Bulletin de la Société chimique de France; Journal de chirurgie; Revue d'immunologie; Revue de la tuberculose; La Presse médicale.*

In addition, current subscribers to these and other publications of this firm can also receive the current issues in micro-reproduction upon payment of twice the normal subscription price.

(189) REPRINTS OF SCIENTIFIC PERIODICALS

Spectrochimica acta

Lange, Maxwell and Springer, Limited, Maxwell House, 242 Marylebone Road, London, N.W.1 (Great Britain) announce that they can now supply *Spectrochimica acta*, vols. 1 and 2 (full size reprint) at £7 each.

Justus Liebigs Annalen der Chemie

Verlag Chemie, GmbH, Weinheim/Bergstr. (Germany) and Johnson Reprint Corporation, 125 East 23rd Street, New York 10, N.Y. (U.S.A.), are publishing jointly reprints of *Justus Liebigs Annalen der Chemie*, vols. 421-542 (1920-1939). Volumes 523-542 appeared in January 1954 at a total price of DM756 ($180), or DM35 ($8.35) for single volumes. Reprints of vols. 421-522 (1920-36) will follow in groups of 20 volumes, beginning with vol. 522. Orders from the U.S.A. and Canada should be placed with Johnson Reprint Corporation, orders from all other countries with Verlag Chemie.

PUBLICATIONS

Under this heading the *Bulletin* mentions new and important bibliographical publications, reference works, recent scientific books and periodicals of special interest. Libraries and publishers are asked to co-operate by supplying us with full details of such publications.

Readers in the countries participating in the Unesco Book Coupon Scheme are reminded that publications reviewed in this section, if obtainable in Austria, Belgium, Burma, Canada, Ceylon, Czechoslovakia, Egypt, France, the German Bundesrepublik, Hungary, India, Indonesia, Iran, Iraq, Israel, Italy, Japan, Mexico, the Netherlands, Pakistan, Sweden, Switzerland, Thailand, Turkey, the Union of South Africa, the United

Kingdom, the United States of America, or Yugoslavia, can be bought with Unesco Book Coupons.

Readers are reminded that the following Unesco periodicals also note new publications of interest to libraries: *Education abstracts* (monthly), *International social science bulletin* (quarterly) and *Current sociology* (quarterly).

Unless otherwise stated all Unesco publications mentioned below are obtainable from Unesco national distributors listed on the inside back cover of each issue of the *Bulletin.*

BIBLIOGRAPHY

(190) UNESCO. *World list of social science periodicals. Liste mondiale des périodiques spécialisés dans les sciences sociales.* Paris, Unesco, 1953. 161 p. 15.5×24 cm. $1.75; 9s.6d.; 450 Fr. fr.

Contains over 600 titles of periodicals published in over 50 countries, specializing either in the social sciences as a whole, or in one of those sciences: sociology, cultural anthropology, demography, social psychology, industrial relations, economics, political science, public administration, or international relations. Periodicals containing studies on statistical problems are included, but legal periodicals are omitted (see below *A Register of legal documentation in the world*). All the periodicals listed were appearing at the end of 1951. For each periodical, information includes the title in the original language, with a translation in English and French if the original title is in one of the lesser known languages, followed by its abbreviation, and full particulars concerning the publisher, editor, frequency, year when first published, size, etc. A description of a particular issue of each review is also given so as to provide an exact idea of its average contents, number of pages, number and length of articles, categories of subjects dealt with, details of the various regular features, news, bibliographies, analytical or critical reviews of books or articles, etc. There are indexes of titles of reviews, of scientific institutions publishing periodicals, of subjects dealt with in the periodicals listed, etc.

(191) UNESCO. *A Register of legal documentation in the world. Catalogue des sources de documentation juridique dans le monde.* Paris, Unesco, 1953. 362 p. 15.5×24 cm. $4; 22s. 6d.; 1,100 Fr. fr.

Prepared by the International Committee of Comparative Law with the support of the International Committee for Social Science Documentation, this register of legal documentation covers 84 countries with their dependencies. The commission set up by the International Committee of Comparative Law to prepare the register consisted of Messrs. Marc Ancel (France), William Sprague Barnes (U.S.A.), Felipe De Sola Cañizares (Spain), and K. Lipstein (U.K.). For each country or territory the register gives detailed information on legislation (statutes, laws, constitutional acts, etc.), law reports, centres of legal documentation, legal periodicals and bibliographies. There is an alphabetical index of countries.

(192) GREAT BRITAIN. NATIONAL INSTITUTE OF ECONOMIC AND SOCIAL RESEARCH. *Register of research in the social sciences in progress and in plan, with a directory of research institutions.* No. 10, 1952/3, August 1953. London, The Institute; Cambridge University Press, Bentley House, 1953. 213 p. 25s.

No. 10 of this annual *Register* provides a comprehensive guide to current social science research in progress in the universities, research institutions and other agencies in the British Isles. It contains 1,557 entries. The second section gives detailed information about the functions and policy, organization and research arrangements of the various organizations responsible for the research recorded

in the *Register*. There are indexes of institutions and their entries, subjects, and research workers' names.

(193) *České časopisy*. Praha, Narodni Knihovna, Klementinum.
Since January 1953 the National Library in Prague has been publishing this monthly bibliography of articles appearing in Czech periodicals. Articles are classified, and each issue contains an author index. This work supplements the *Bibliografický katalog C.S.R.*, a bibliography of current literature published in Czechoslovakia (see *Bulletin*, vol. IV, no. 2, item 90).

(194) BIOLOGISCHE ZENTRALANSTALT FÜR LAND- UND FORSTWIRTSCHAFT IN BERLIN-DAHLEM. *Bibliographie der Pflanzenschutzliteratur. Bibliography of plant protection. Bibliographie de la protection des plantes 1940-1945.* Berlin, Verlag Paul Parey, Lindenstrasse 44-47 (Westberlin), 1953. 1,308 p. DM97.
After an interruption of almost 10 years, publication of this systematic bibliography of world literature on plant protection, first published in 1921, has been resumed. The two volumes for 1940-45 contain nearly 27,000 entries and an author index of over 11,000 names. Preface, introduction, and chapter headings are given in English, French and German. Subsequent volumes are to follow, the first of which will cover the years 1946-51.

(195) MOID (A.); SIDDIQUI (Akhtar H.). *A Guide to periodical publications and newspapers of Pakistan.* Karachi, Pakistan Bibliographical Working Group, c/o Karachi University Library, 1953. 60 p. (*Pakistan bibliographical working group publication no. 2.*) Rs.3.
The first part of the guide lists scientific and technical journals published in Pakistan. Subjects covered include: agriculture, commerce, communications and transport, economics, education, engineering, films, geography, history, hygiene, law, library science, psychology, statistics, zoology, etc. Entries are arranged by subjects and in each case give publisher and place of publication, frequency, price, and language where it is other than English. Separate lists enumerate periodical publications dealing with literature and languages, Islam, general magazines arranged by languages, and women's and children's magazines. Finally, the guide lists 50 daily, 10 bi-weekly, 144 weekly and 5 fortnightly newspapers published in Pakistan, indicating address, price and language.

(196) NETHERLANDS INSTITUTE FOR DOCUMENTATION AND FILING. *List of scientific and learned periodicals in the Netherlands.* The Hague, Martinus Nijhoff, 9 Lange Voorhout, 1953. 63 p. 16×24.5 cm. [Publication no. 4 (2nd series) of the Netherlands Institute for Documentation and Filing (NIDER)]. 6.50 florins.
This is a revised and much enlarged edition of *Scientific periodicals in the Netherlands*, first published in 1947 by the National Council for Applied Scientific Research (TNO). It lists 491 titles of the more important periodicals and serial publications in the Netherlands in all fields of pure and applied science and the humanities. In the first part titles are listed in a single alphabetical sequence. Information given in each case includes former title (where applicable), frequency, importance, first year of publication with main periods of suspension, annual subscription, name and address of publisher or address where the periodical can be obtained, and a short description in English of the contents, languages used, and other remarks. The second part lists by subjects only current periodicals under their latest title.

(197) TURKEY. MILLÎ KÜTÜPHANE. PERIYODIKLER BÖLÜMÜ. *Aylik bülteni.* Yil: 1, Sayi: 1-3, Ocak-mart 1953. Ankara, Millî Kütüphane.
A bulletin issued by the Periodicals Section of the National Library, Ankara,

containing a select list of periodical holdings in the library. The first number is dated January-March 1953, since when it has appeared monthly. The first part lists Turkish periodicals arranged by subject, the second part foreign periodicals also by subject, giving bibliographical details.

(198) CANADA. DEPARTMENT OF MINES AND TECHNICAL SURVEYS. GEOGRAPHICAL BRANCH. *Selected bibliography of Canadian geography with imprint 1952.* Ottawa, The Department, 1953. 52 p. Mimeo. (*Bibliographical series no. 10,* cumulative edition).

A select list of publications on Canadian geography published during 1952 in Canada or elsewhere. There is a section on Canada as a whole, followed by sections on the various provinces. Within each section entries are arranged under the following headings: description, exploration, travel, biogeography, economic, human, physical geography, etc.

DICTIONARIES, DIRECTORIES

(199) RÉAU (Louis). *Dictionnaire polyglotte des termes d'art et d'archéologie.* Paris, Comité International d'Histoire de l'Art; Presses Universitaires de France, 108 boulevard Saint-Germain, 1953. 251 p. Paper bound: 864 Fr. fr.; cloth bound: 1,440 Fr. fr.

This dictionary of expressions used in art and archaeology has been published under the auspices of the International Council of Philosophy and Humanistic Studies. It is arranged in alphabetical order of the French words followed by equivalents in 12 languages; Latin, where applicable; three main Latin languages—Italian, Portuguese and Spanish; five Germanic languages—Danish, Dutch, English, German and Swedish; and three Slav languages—Czech, Polish and Russian. It does not give all 12 equivalents for every word or expression, but in each case gives at least one specimen of each family of Indo-European languages. Russian words are transliterated and sometimes written phonetically. In addition to strictly technical terms, it includes iconographic phrases frequently used in the history of art, and translations of certain titles of famous paintings. Published with assistance from Unesco.

(200) UNESCO. CENTRO DE COOPERACIÓN CIENTÍFICA PARA AMÉRICA LATINA. *Instituciones científicas y científicos latinoamericanos. Uruguay.* Vol. II. Montevideo, El Centro, Bulevar Artigas 1320, Apartado de Correos No. 859, 1953. 259 p. Free on request.

The second edition of this list of scientific institutions and scientists in Uruguay contains a considerable number of additions to the first volume published in 1949. For each of nearly 100 institutions it gives the address, date of establishment, whether it belongs to a university, government department, etc., or is a private institution, name of director and details of personnel, special subject field, budget, publications. For each scientist are given: address, special subject field, present occupation, studies and diplomas, published works, and scientific societies to which he belongs.

LIBRARIANSHIP

(201) *Zeitschrift für Bibliothekswesen und Bibliographie.* Frankfurt am Main, Vittorio Klostermann, Klüberstr. 6. Annual subscription: DM36.

This new quarterly library journal, the first number of which is to appear this month, replaces the *Nachrichten für wissenschaftliche Bibliotheken*, the last number of which appeared in December 1953. The editors of the new review are H. W. Eppelsheimer (Frankfurt), G. Hofmann (Munich), and H. Tiemann (Hamburg). It will publish scientific and detailed articles on fundamental

problems of librarianship and news on all important events taking place in Germany and in other countries in librarianship and allied subjects. There will be a bibliographical section. As the organ of the Association of German Librarians (Verein Deutscher Bibliothekare), it will also act as information bulletin for its members.

(202) ESSEN. ARBEITSGEMEINSCHAFT DER TECHNISCH-WISSENSCHAFTLICHEN BIBLIOTHEKEN. *Bericht über die 5. Tagung in Braunschweig am 26. und 27. März 1953 anschliessend im Gmelin-Institut Clausthal am 28. März 1953.* Essen, Die Arbeitsgemeinschaft, Friedrichstrasse 2 (Bergbau-Bücherei), 1953. 111 p.

A report on the proceedings of the meeting held by the German Association of Technical and Scientific Libraries in Braunschweig and Clausthal from 26 to 28 March 1953. About 180 participants from West Germany and the western sector of Berlin, and Austria, the Netherlands and Switzerland attended. Subjects discussed included documentation in pharmacy, industrial libraries, microfilms, copyright problems raised by photocopying and microcopying, usefulness of reproduction equipment for cataloguing and abstracting, printing of theses, professional training, etc.

(203) SHORES (Louis), ed. *Challenges to librarianship.* Tallahassee, Florida State University, 1953. 156 p. 15×23 cm. (*Florida State University Studies, no. 12.*)

Contains eight public lectures given at the Florida State University, Tallahassee, during the academic year 1952-53, dealing with the answers that librarianship can give to meet the challenges of international understanding, censorship, microphotography, the sciences, audio-visual media, school librarianship, literature of librarianship, etc.

BIOLOGY

(204) *Československá biologie. Ruské znění časopisu Československá biologie s německým resumé.* Praha XIX, Československá Akademie věd Biologický Ústav, Na Cvičišti 2. Annual subscription: 60Kčs; single copy: 10Kčs.

A biological review which began publication in 1952. It appears six times a year in separate Czech and Russian editions. The Russian edition, a recent copy of which has been received in the *Bulletin* office, contains German summaries. Articles are illustrated with photographs, drawings, graphs, etc.

MOROCCAN RESEARCH

(205) *Tamuda. Revista de investigaciones marroquíes.* Año 1, semestre 1, 1953. Tetuán, Alta Comisaría de España en Marruecos, Delegación de Educacíon y Cultura. Annual subscription: Spain and Morocco, 100 ptas.; other countries, $4; single no.: Spain and Morocco, 60 ptas.; other countries, $2.50.

Within the last 15 years great progress has been made in Spanish Morocco in all branches of science, education and culture. This new half-yearly review will publish articles on results already obtained or research work at present in progress in all these fields. It will also contain news and information sections and book reviews. The review is illustrated; articles are in Spanish and Arabic. The first number includes a report on a scientific mission to the French Sahara, an article on the five last chapters of Ibn Bassal's agricultural work and another on two Lixus bronzes recently excavated. There is also a literary supplement entitled "Ketama" containing poems and articles in Spanish and Arabic. The review is offered for exchange.

GENERAL NEWS

(206) CUBAN SEMINAR ON EXCHANGE OF PUBLICATIONS

A seminar on the national and international exchange of publications, sponsored by the Asociación Cubana de Bibliotecarios, was held from 2 to 12 December 1953 in Havana, Cuba. The Unesco Regional Office in Havana co-operated fully in the planning of this new attempt to develop and promote the exchange of publications among libraries and institutions in Latin America.

Miss Guillermina Castillo Cué was elected president of the seminar. The vice-president was Mr. Dionisio de Lara Minguez, and the general secretary Mr. Carlos Victor Penna, assisted by Miss Elda Canfux Blanco and Miss Concepción Rey Suárez. Over 130 persons took part and 27 observers from government and academic institutions attended.

The seminar urged the immediate creation of a Cuban publications exchange centre, and defined the duties and organization of such a centre; a permanent co-ordinating committee on exchanges was set up to ensure the creation of the centre and to see that other activities recommended by the seminar were carried out. It also urged the implementation by Cuba of the Unesco Agreement on the Importation of Educational, Scientific and Cultural Materials (see *Bulletin*, vol. VI, no. 5-6, item 216, and no. 8-9, item 366), and other measures to promote the easier and cheaper access to publications by Cuban libraries.

In the presence of the representative of the Government of Nicaragua, a bi-lateral agreement for the exchange of publications between Cuba and Nicaragua was drawn up. Representatives from 16 other states, including many from Latin American countries expressed their interest in concluding exchange agreements of a similar nature.

The full proceedings of the seminar are available from the Asociación Cubana de Bibliotecarios, Carlos III, No. 710, La Habana, Cuba.

(207) CATALOGUES OF ORIENTAL AND WESTERN MSS.

The Leiden University (Netherlands) contains important collections of Oriental and Western manuscripts, which were partly formed in the seventeenth and eighteenth centuries. Catalogues of several of these collections have been published in the last decades, and in recent years some new volumes have been added.

Vol. IV of *Codices manuscripti*, compiled by Dr. K. A. de Meijier, assistant of the European Manuscript Department, was published in 1946. It gives details of the collection of manuscripts donated to the library by Perizonius. A catalogue of medieval Dutch manuscripts before 1550, compiled by Dr. G. I. Lieftinck, conservator of the same department, was issued in 1948. These manuscripts belong to the Library of the Society of Dutch Literature, housed in the Leiden University Library, and the catalogue is vol. V, part 1 of the catalogue series, viz. (*Catalogue*) *Codium in finibus belgarum ante annum 1550 conscriptorum, qui in bibliotheca universitatis asservantur. Cod. 168-360 Societatis cui nomen Maatschappij der Nederlandse letterkunde.* A catalogue of Greek manuscripts belonging to the important Vossius collection, also compiled by Dr. K. A. de Meijier, has recently appeared. This collection was placed in the Leiden Library in the seventeenth century. The fifth part of *Repertorium* (*Petit*) *der verhandelingen en bijdragen betreffende de geschiedenis des vaderlands* has also been published (see *Bulletin*, vol. VIII, no. 2-3, item 116).

NEW PERIODICALS
PÉRIODIQUES NOUVEAUX

208) **JAPAN / JAPON**

At the 1950 and 1951 meetings of the International Committee of the International Federation of Library Associations, the Libraries Division of Unesco offered to publish in the *Bulletin* national lists of new periodicals. The Libraries Division will be glad to receive such lists submitted by national library associations, library authorities or national commissions for Unesco; as space permits, it will publish them.

A select list of Japanese periodicals which first appeared or resumed publication during 1952 and the first part of 1953 is given below. Periodicals written only in Japanese have been omitted. The list has been supplied by the National Diet Library, Tokyo. Information concerning each periodical is given in the following order: original title, English translation in brackets, editing body and its address; frequency; language (s); whether a new publication; price in Japanese yen or U.S.A. dollars.

Lors des réunions tenues en 1950 et 1951 par le comité international de la Fédération internationale des associations de bibliothécaires, la Division des bibliothèques de l'Unesco a offert de publier dans le Bulletin *des listes nationales de périodiques nouveaux. La Division des bibliothèques recevra donc avec plaisir les listes que lui soumettront les associations nationales de bibliothécaires, les organismes responsables des bibliothèques ou les commissions nationales pour l'Unesco; elle les fera paraître dans la mesure de la place disponible.*

On trouvera ci-dessous une liste sélective de périodiques japonais qui ont paru pour la première fois — ou qui ont recommencé à paraître — en 1952 et pendant le premier semestre de 1953. Les périodiques rédigés uniquement en japonais n'y figurent pas. Cette liste a été fournie par la bibliothèque de la Diète nationale, à Tokyo. Les renseignements concernant chaque périodique sont présentés dans l'ordre suivant: titre original avec traduction anglaise entre parenthèses, nom et adresse de l'éditeur, périodicité, langue(s), s'il s'agit d'une publication nouvelle, prix en yen japonais ou en dollars (É.-U.A.).

PUBLICATIONS WANTED
PUBLICATIONS DEMANDÉES

The most urgent requests received by the Unesco Clearing House for Publications are listed below. Libraries able to offer any of the works needed are asked to communicate directly with the library concerned.

In addition, libraries in countries in which the Unesco Gift Coupon Scheme is now operating are urged to consider using the scheme to help meet these needs.

Nous publions ci-dessous la liste des demandes les plus urgentes reçues par le Centre de l'Unesco pour l'échange des publications. Les bibliothèques qui peuvent offrir certains des ouvrages énumérés sont instamment priées de se mettre directement en rapport avec l'institution qui en a besoin.

D'autre part, les bibliothèques des pays qui appliquent le système des bons d'entraide Unesco sont priées d'examiner la possibilité d'utiliser ces bons pour contribuer à satisfaire ces demandes.

ARGENTINA / ARGENTINE

(209) BIBLIOTECA POPULAR PESTALOZZI DEL C.A. ESTRELLA DE BERISSO, Domingo Leveratto 4067, Berisso, FCNGR,

NOTICE / AVIS

Libraries interested in circulating lists of publications offered for free distribution and exchange to institutions in all parts of the world are invited to send their lists to the Unesco Clearing House for Publications. *Please do not send books or periodicals* to Unesco since storage space and personnel are not available for handling such material. A list of titles arranged in classified library form is sufficient.

Les bibliothèques qui désirent faire circuler des listes de publications offertes aux institutions du monde entier, à titre gratuit ou aux fins d'échange, sont priées d'envoyer les listes de titres classés par sujets au Centre de l'Unesco pour l'échange des publications. *Prière de ne pas adresser de livres ou de périodiques* à l'Unesco, qui ne dispose ni de la place ni du personnel nécessaires pour les conserver et les classer.
